

Queensland Development Code MP 4.2 and 4.3

Application to opt-in to QDC requirements:

- MP4.2 – Rainwater tanks and supplementary water supply systems (new houses)**
- MP4.3 – Supplementary water sources (new commercial and industrial buildings)**

1. Local government name	<input type="text"/>
2. Local government area (or part) where supplementary water systems are proposed to apply If the application is sought for part of a local government area, clearly indicate the proposed area and include maps. NOTE: If the application is approved for part of a local government area, the local government should ensure that maps and information are publicly available and indicate areas (i.e. by cadastre boundaries) where the supplementary water systems are required.	<input type="checkbox"/> ALL of the local government area; or <input type="checkbox"/> PART only of the local government area. Please identify the area below and attach map. <input type="text"/>
3. Evidence to support application Include a brief summary on this form of the key points justifying the local government's position. A cost-benefit analysis demonstrating how opting-in to supplementary water systems will deliver a net benefit to the local community must be attached. If the provisions QDC MP 4.2 and/or MP 4.3 are intended to be varied, the report must include this variation in its analysis to justify the variation(s) for consideration by the Minister. A minimum lot size can also be specified for the inclusion of supplementary water systems e.g. >250m ² .	<input type="checkbox"/> Cost-benefit analysis completed and attached. SUMMARY: <input type="text"/>

4. Signature of Chief Executive Officer

This application must be signed by the Chief Executive Officer of the Council.
